AFRL awards \$1.8M contract to Canandaigua firm

by Fran Crumb, Information Directorate

ROME, N.Y. — The Air Force Research Laboratory (AFRL) has awarded a \$1,850,000 contract to Infotonics Technical Center of Canandaigua.

The two-year agreement, Microwave Photonics, is funded through the Air Force Materiel Command.

“The Infotonics Technology Center will establish a state-of-the-art prototype and pilot fabrication facility,” said Steven T. Johns, program manager with the Sensors Directorate at the AFRL Rome Research Site. “These activities will be focused on next-generation optical communications networks, advanced imaging, assembly and packaging of high-speed devices and biochemical sensors.” @
